Guartel Technologies Ltd

DIVE**TECT**™

UNDERWATER METAL DETECTOR

DESCRIPTION

The Guartel Technologies Ltd DIVE**TECT** is a compact metal detector, designed specifically for use under water. DIVE**TECT** is ergonomically designed to be operated with hand one, for comfort and ease of operation. Powered by AA batteries, tested to operate at depths of 60 metres.

DIVE**TECT** will detect ferrous and non- ferrous metals including gold, use of the pinpoint trigger and LED display means that targets can be accurately located, even within the vicinity of other metallic items.

DIVE**TECT** has vibrate and visual alarms. The diver can feel the vibrate alarm even when wearing dive gloves, this means targets can be located in low or nil visibility conditions.

DIVE**TECT** can also be utilised in the surf zone and on land.

DIVE**TECT** is designed to meet the demands of hobby, commercial, law enforcement and military divers.
