MD4

METAL DETECTOR

NSN 6665-99-282-4063

DESCRIPTION

The Guartel Technologies MD4 Metal Detector is designed for use in:

- **Counter Improvised Explosive Device (CIED) operations**
- **Counter Terrorist Search (CTS) operations**
- **Crime Scene Investigation**
- **Post Blast Scene Investigation**

The MD4 is used by many NATO countries including the UK and USA, it is rugged and simple to use and meets UK Defence Standards. The MD4 uses 4 x C cell batteries giving approximately 18 hours continuous use.

The detection capabilities allow the operator to locate small targets and to gauge the depth and size of objects such as victim operated switches.

MD4 is self calibrating with operator zeroing function. When used as a detection tool for crime scene investigation the smallest pieces of metal can be located, the probe design allows the MD4 to be used in scrub and hedge rows, the probe can also be used in water. The MD4 is supplied in a ruggedised Peli-Hardigg Storm 3100 transit case.

SPECIFICATIONS	
Deployed Weight:	2.17 Kg (incl batteries)
Deployed Length:	1220mm
Target Alarm:	By Volume and Pitch
Controls:	ON/OFF & Zero
Typical Detection:	9mm ammunition case 177mm, 1 Euro coin 220mm

Components

- Control Unit
- Probe
- Earpiece
- Battery Carrier
- Soft Case Storm Transit Case
